

MEDICAL DECLARATION – Dual Pilot (any member qualified to fly with another person)

I confirm that I am in good general health and do not suffer from any condition that may compromise my ability to fly safely with a passenger. If at any time I suspect that any condition, impairment, or medication may affect my ability to safely act as a pilot in command, I will not fly without seeking medical advice that I am fit to do so.

Please read the notes below before signing.

Advice to pilot's and medical professionals: it is not practical to list every adverse condition, but our guidelines are the same as the DVLA's medical standard for a Class 1 (car) driving licence. <https://www.gov.uk/health-conditions-and-driving> this is also the basis for the CAA's LAPL Self- Declaration.

If you are unable to comply with the medical, currency, or other requirements to renew your dual pilots licence, but still wish to retain it, please contact a member of the Technical Team for further advice.
